Immune System Overview

Qatar Independent Secondary School

Unit:3- Human immune system Support -5 (STANDARDS: 11.6)

1. Classify the correct type of immunity? Put (+)Mark

	Active	Passive
A		
B		
C		
D		

2- How are vaccines effective in preventing disease? Why do you develop disease even after getting vaccine?

3-Differentiate between Active natural immunity and Passive natural immunity?

4. A vaccine may contain _____.
 a. white blood cells that fight infection b. antibodies that recognize invading microbes
 c. inactivated disease-causing microbes d. a hormone that boosts immunity

5. Explain why the response to the secondary infection is much greater than the response to the primary infection?

Name _____ Class _____ Date _____

How does the body fight disease?

Learning Objectives

Write the term that best completes each statement in the space provided.

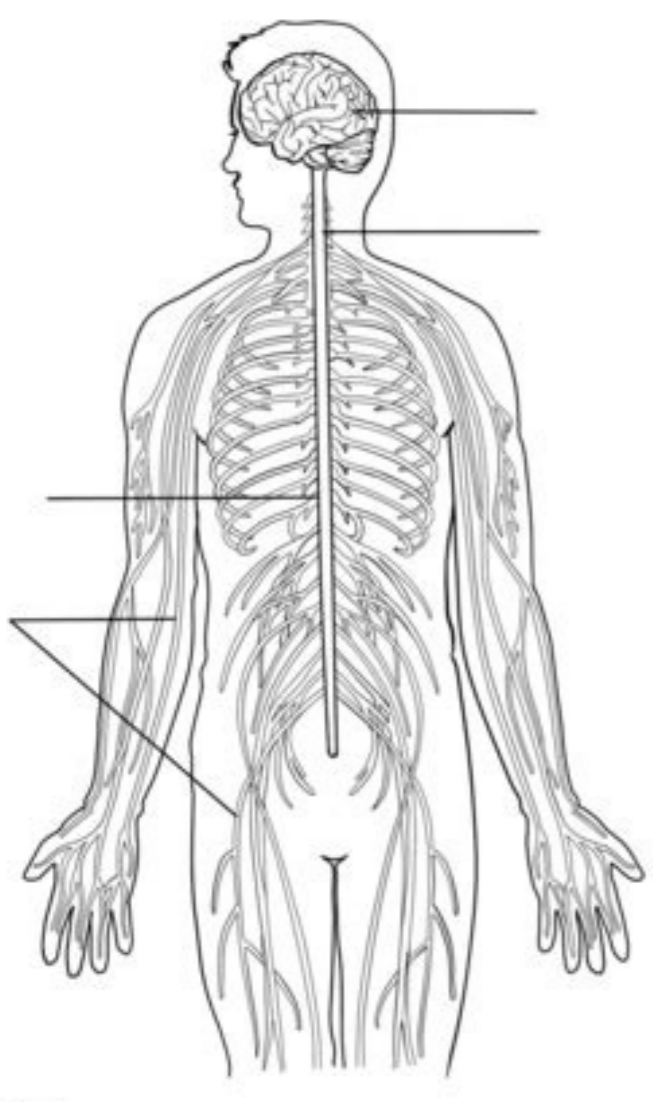

- Your body usually can prevent most from those because it has _____ against disease.
- The body systems that help protect you from disease include the skin and the _____, _____, _____, _____, _____, _____, _____, and _____ systems.
- The skin is made up of several layers of _____.
- Hydrochloric acid in the _____ helps in killing bacteria and viruses that enter the body through the mouth.
- The ribs and _____ of the respiratory system help to trap germs before they can enter the lungs.
- One kind of white blood cell, called a _____, can move and change shape like an amoeba.
- Other types of white blood cells, called _____, also help with fighting disease.
- The lymphatic system transports white blood cells _____.
- Pathogens contain chemical signals, called _____, that tell the immune system that it is a foreign substance.
- Substances called _____ help destroy substances that carry antigens.

Self-Challenge

Write something interesting

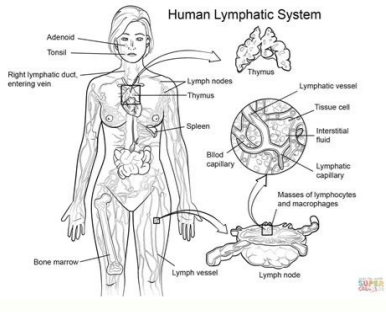

Explain how the immune system works. How does each part of the body's defense system help to protect the body from harmful germs?

Defense	How it Works
1. Skin	
2. Hair	
3. Cilia and mucus	
4. Tears	
5. White blood cells	
6. Lymphatic system	
7. Antibodies	

Word Bank

Brain Nerve Peripheral Nervous System
 Ganglion Spinal cord Central Nervous System

Lymph, a clear and yellowish fluid, is created after the plasma is filtered and absorbed into the lymphatic capillaries. You'll also need to know how the lymphatic anatomy of different organs. See all the parts of the lymphatic system clearly labeled? Bored by anatomy? The antibody is not a cell, but a Y-shaped protein produced by white blood cells. The weak spot of pathogens that antibodies attack is a unique molecule called the antigen. It also produces the white blood cells called T-lymphocytes. Try this → In order to continue enjoying our site, we ask that you confirm your identity as a human. What do you prefer to learn with? Label them yourself! This lymphatic system labeling quiz is sure to expose the final holes in your knowledge.
